

ABI Perfect Pump Primer

Our PERFECT PRIMERS are built for fast, reliable priming in pump installations with high suction lifts or extra-long suction lines. Here at ABI, we offer AC or DC units for a variety of applications. Ideal for diesel-powered irrigation pumps.

Timer switch enables you to check for suction leaks while priming. Flow switch to turn unit off when primed.

Reduces pump wear and gland packing failure compared with to engine powered priming pumps.

Operating Instructions

- Connect power cord to a 12 volt dc source.
- Connect top port on primer to a valve at suction end of pump.
- Make sure all suction connections are connected.
- Open valve at suction end of pump.
- Turn on primer timer switch.
- When tank begins to fill with water, Turn off valve at pump.
- Turn off timer switch.

You Are Primed!
